Who We Are

Quest Diagnostics is the world's leading provider of diagnostic information. We turn data into insights that transform people's lives. Our insights inspire people, physicians, health plans, hospitals, employers and others to take action and make better decisions to improve health outcomes.

We're looking for a skilled, caring, and motivated individual who has passion for helping patients and customers, strong technical skills and experience working in a fast-paced and dynamic environment. By joining our team of phlebotomists, you can play an important role in providing critical healthcare information to physicians and their patients, helping to create a healthier world.

If you have a passion for the customers we serve and the work we do, this is a place for you to build a rewarding career. Our position at the forefront of the healthcare industry makes life at Quest Diagnostics exciting. As a member of our team, you can expand your skills and knowledge. Your colleagues are committed to improving healthcare and finding creative ways to do so. The atmosphere is stimulating and challenging. And the opportunities are almost limitless.

Job Summary

The Patient Services Representative II (PSR II) represents the face of our company to patients who come to Quest Diagnostics, both as part of their health routine or for insights into life-defining health decisions. The PSR II draws quality blood samples from patients and prepares those specimens for lab testing while following established practices and procedures. The PSR II has direct contact with patients and creates an atmosphere of trust and confidence while explaining procedures to patients and drawing blood specimens in a skillful, safe and accurate manner. The PSR II will demonstrate Quest Leadership Behaviors while focusing on process excellence skills and sensitivity to confidentiality and accuracy to patient information. Successful applicants may be assigned to a doctor's office, a patient service center, in a house call environment, long term care or as business needs dictate.

Job Accountabilities (Responsibilities)

1. Collect specimens according to established procedures. This includes, but not limited to: drug screens, biometric screening and insurance exams.
2. Administer oral solutions according to established training.
3. Research test/client information and confirm and verify all written and electronic orders by utilizing lab technology systems or directory of services.

4. Responsible for completing all data entry requirements accurately including data entry of patient registration; entry of test order from requisition or pulling order from database; managing Standing Orders.
5. Enter billing information and collect payments when required, including the safeguarding of assets and credit card information.
6. Data entry and processing specimens including: labeling, centrifuging, splitting, and freezing specimens as required by test order.
7. Perform departmental-related clerical duties when assigned such as data entry, inventory, stock supplies, and answer phones when needed.
8. Read, understand and comply with departmental policies, protocols and procedures: (i.e. Procedure Manuals, Safety Manual, Compliance Manual, Automobile Policies and Procedures, Employee Handbook, Quality Assurance Manual); and ensure that all staff members follow instructions.
9. Perform verification of patient demographic info / initials including patient signature post-venipuncture to verify tubes were labeled in their presence and that the name on the label is correct.
10. Assist with compilation and submission of monthly statistics and data.
11. Maintain all appropriate phlebotomy logs in a timely manner and based on frequency, such as maintenance logs and temperature logs.
12. Complete training courses and keep up-to-date with the latest phlebotomy techniques.
